IV_MD_2015_47 New material in construction - "Termo-Fono-Izolant"

Objective

The main goal of the project is to introduce the certified insulation material "Termo-Fono-Izolant" in the market. This plaster "Termo-Fono-Izolant" is a green product, which is naturally harmless, suitable for thermal and acoustic insulation of exterior and interior walls of buildings. It is water repellent (hydrophobic), ensures that the wall "breathes", and prevents mold.

Expected outcomes

- Introducing the material "Termo-Fono-Izolant" in the market;
- developing an attractive packaging system for the customers.

Company description

"New Products and Technologies" Ltd is a start-up company dealing with new products and technologies related to energy efficiency: new construction materials, advanced and ecologically clean insulation materials that can be used both outdoors and in the interior living space. The company is also installing geothermal heat pumps, and other equipment for producing energy from renewable sources.

Research Partner

Institute for Scientific Research in Construction "INCERCOM" and Moldavian construction laboratory "Plant Construction Elements" (www.fec.md).
